£5.34

Choose whether you would like to do column A or column B. Column B is a little tougher . . .

A - You have £5 each time. How much change do you get when you buy:

- 1) An ice cream
- 2) A beach ball
- 3) A drink and a sandwich.

You have £10 each time. How much change do you get when you buy:

- 4) A sandwich and a bucket and spade
- 5) Two ice creams
- 6) A bucket and spade and two drinks

Imagine you have £20. You can buy any 2 items in the shop. What would you buy? What would the total cost be? How much change would you get?

Can you try it a second time with different items?

B -You have £20 each time. How much change do you get when you buy:

- 1) A sandwich and a body board
- 2) A bucket and spade and two beach balls
- 3) Two ice creams and two drinks

You have £50 each time. How much change do you get when you buy:

- 4) A wetsuit and a body board
- 5) 3 sandwiches and a drink
- 6) A frisbee, a beachball and a body board

Imagine you have £75. You can buy any 4 items in the shop. What would you buy? What would the total cost be? How much change would you get?

Can you try it a second time with different items?
